MiVueltica — Frontend requirements

Oct 22, 2026 · @Gabriel

Summary

MiVueltica is an iOS and Android app, built with Expo, that helps families, students and seniors in Costa Rica find free or low-cost places and events: every plan costs ₡5.000 per person or less. The community adds plans ("vuelticas"), checks that they are still free, reviews them, reports problems and moderates new submissions; a reputation system ("Confianza en tus vuelticas") rewards accurate contributors.

These requirements are read off the Figma file **MiVueltica — App Design** (pages iOS, Android, Foundations and the two prototype pages). Every screen exists in light and dark mode on both platforms. UI copy is quoted in Spanish exactly as designed; numbers in the designs (vote counts, points, pending items) are pending review by the team.

Screen	Purpose
01 Mapa	Home: map of plans with search, filter chips and a results card
01b Mapa filtrado	Map after applying filters (example: Estudiantes)
02 Lista	List of plans with Todo / Lugares / Eventos and chips
03 Detalle	Bottom sheet with a plan's details, actions, verification, reviews and Reportar vueltica
04 Filtros	Filter sheet: type, price, audience, distance, date, accessibility
05 Iniciar sesión	Optional sign-in (Apple, Google, email)
06 Nueva vueltica	Form to submit a place or event
07 Reseñas	All reviews of a plan
08 Bienvenida y ubicación	First run: location permission or pick a province
09 ¿Sigue siendo gratis?	Verification sheet
09b Reportar vueltica	Report sheet
10 Escribir reseña	Review composer

Screen	Purpose
11 Vueltica enviada	Submission confirmation and moderation status
12 Cómo llegar	Pick Apple Maps, Google Maps or Waze
13 Guardados	Saved plans
14 Perfil	Profile, reputation card, moderation entry, my vuelticas, socials, account
14b Confianza	Pop-up explaining the reputation system
15 Ajustes	Settings: appearance, accessibility, notifications, preferences, privacy
16 Sin resultados	Empty state for search or filters
17 Sin conexión	Offline state with cached plans
18 Cargando	Skeleton loading state
19 Resultados de búsqueda	Search results
20 Moderación	Moderation queue: new and reported vuelticas

Business rules

The app only lists plans at ₡5.000 per person or less, and the rest of the rules govern who can publish, verify and hide them.

Price

- A plan's price is one of three tiers: **Gratis**, **Hasta ₡2.500**, **Hasta ₡5.000** (₡2.501–₡5.000). Anything above ₡5.000 is not published and is hidden if verification shows the price went up.
- Pins fade by tier: Gratis at full strength, ₡2.500 at 75 % opacity, ₡5.000 at 50 %; a selected pin is always full strength.
- A plan may be free for some audiences only ("Gratis para estudiantes", "Gratis para ciudadanos de oro").

Types and audiences

- Type: **Lugar** (place, bench glyph, green) or **Evento** (event, ticket glyph, red); events have a date and time range.
- Audiences: Todo público, Familias, Estudiantes, Ciudadanos de oro (65+). Extra attribute: accessible by wheelchair.

Publishing and moderation

Rule	Value in the design
Votes to publish a new vueltica, author below level 3	5
Votes to publish, author at level 3 or higher	3
Who can moderate	Level 3 · De confianza and above
Moderator actions on a new vueltica	Aprobar / Rechazar
Moderator actions on a reported vueltica	Sigue igual / Ocultar vueltica
Decision	Majority of votes; moderators who often vote against the majority lose trust
A vote can be undone	Yes ("Deshacer")
Unpublished vueltica on the map	Yellow "Pendiente" pin, visible only to its author and to moderators

Verification and reports

- Anyone viewing a plan can confirm it ("Sí, sigue igual") or open the verification sheet ("Algo cambió") to answer: still happening, price paid, schedule correct, plus an optional photo.
- When **3 people report the same change**, the listing is updated; if the price passes ₡5.000 or the plan no longer exists, it is hidden from the map.
- Reports ("Reportar vueltica") are anonymous. Reasons: Ya no existe o cerró, Ya no es gratis, Cuesta más de ₡5.000, Horario o lugar incorrecto, Contenido inapropiado (in case it is not detected by GPT Decision), Es spam o publicidad, Otro. **3 matching reports** hide the vueltica while moderators review it.

Reputation ("Confianza en tus vuelticas")

Event	Points
One of your vuelticas is published	+10
You verify whether a plan is still free	+2
Someone marks your review as useful	+1
You cast a moderation vote	+1

Event	Points
One of your vuelticas is rejected or reported as incorrect	loses points (amount not set)

Level	Name	Unlocks
1	Primeras vueltas	Vuelticas need 5 votes
2	En ruta	Can verify prices
3	De confianza	Vuelticas need 3 votes; can moderate
4	Guía local	Verifications count double
5	Leyenda tica	Helps moderate vuelticas

The profile shows level, points and points to the next level (sample: level 3, 172 points, 28 to go). Level thresholds are not defined yet.

Accounts

- Browsing, filtering, directions and reading reviews work without an account. Saving, submitting, reviewing and moderating need sign-in (Apple on iOS, Google, or email).
- Deleting the account removes profile, reviews and pending vuelticas; published vuelticas stay, credited to “Anónimo”.

Functional requirements

Each area lists what the screen must do; IDs (FR-x.y) are for tracking.

Navigation

- FR-1.1 Five tabs: Mapa, Lista, Aportar, Guardados, Perfil. Native tabs on both platforms (SF Symbols / Material icons).
- FR-1.2 Forward navigation pushes from the right; sheets (Detalle, Filtros, Verificación, Reportar, Escribir reseña on iOS, Cómo llegar) slide up over the current screen, which stays visible behind them. Login and Android's review composer open full-screen from the bottom.
- FR-1.3 Sheets close with their close or cancel button or by tapping outside. Going from one sheet to another (Detalle → Cómo llegar, Verificación, Reportar, Login) replaces the sheet instead of stacking it.
- FR-1.4 The account icon (iOS) or avatar in the search bar (Android) opens Perfil.

First run (08)

- FR-2.1 Explain location use ("solo mientras usás la app") and ask for permission with "Permitir ubicación".
- FR-2.2 Without permission, let the user pick a province (San José, Alajuela, Cartago, Heredia, Guanacaste, Puntarenas, Limón) or skip with "Ahora no".

Map (01, 01b)

- FR-3.1 Show plans as pins by type and price tier; cluster nearby pins with a count; show the user's location.
- FR-3.2 Show the user's own unpublished vuelticas (and, for moderators, the queue) with the yellow Pendiente pin; tapping it opens Moderación.
- FR-3.3 Search field, quick chips (Filtros, Lugares, Eventos, Solo gratis, Estudiantes, Ciudadanos de oro) and a locate-me button.
- FR-3.4 The results card shows the count and how many are free ("20 planes de hasta ₡5.000 · 14 gratis"); tapping it opens Lista.
- FR-3.5 With filters applied, the Filtros chip shows the active count ("Filtros · 1"), the matching chips are selected and the card reflects the filtered count ("18 planes para estudiantes").
- FR-3.6 Tapping a pin opens Detalle as a sheet.

List (02) and loading (18)

- FR-4.1 Segmented control Todo / Lugares / Eventos; chips Filtros, Cerca de mí, Solo gratis, Estudiantes, Ciudadanos de oro.
- FR-4.2 Header with the count and price cap and a sort menu ("Más cercanos").
- FR-4.3 Activity cards: photo, title, type and distance, schedule, badges (Gratis, Verificado hoy, Evento, Estudiantes, Ciudadanos de oro, price), rating and a save button.
- FR-4.4 Show a skeleton list while loading; in the prototype it shows for 1 second whenever Lista opens.

Search (19) and empty state (16)

- FR-5.1 Tapping the search field opens search results for the typed query (example "museo"), with the count ("2 resultados para «museo»"), the same filters and Cancelar (iOS) or a back arrow (Android).
- FR-5.2 No results: suggest "Ampliar a 5 km", "Aportar un lugar" and (Android) "Limpiar filtros", showing the active filters.

Filters (04)

- FR-6.1 Type (Lugares, Eventos), price (Hasta ₡5.000, Hasta ₡2.500, Solo gratis), audience switches (Estudiantes, Ciudadanos de oro, Ideal para familias), distance slider (to 5 km from current location), date (Cualquier día, Hoy, Fin de semana, Android

also Elegir fechas), accessibility.
- FR-6.2 "Limpiar" resets; the main button shows the live count ("Mostrar 18 resultados") and returns to the map with filters applied.

Detail (03)

- FR-7.1 Title, rating and count, type, distance, badges, photo, date/time, address, price and conditions, audience perks, accessibility, description.
- FR-7.2 Actions: Cómo llegar, Guardar (asks to sign in when signed out), Compartir.
- FR-7.3 Verification block "¿Sigue siendo gratis?" with last check and count, "Sí, sigue igual" and "Algo cambió".
- FR-7.4 Community line ("Vueltica de Carlos M. · verificada por 23 personas", updated date) and a **Reportar vueltica** button.
- FR-7.5 Reviews preview with "Ver todas (126)"; the sheet scrolls.

Directions (12)

- FR-8.1 Offer Apple Maps (iOS only), Google Maps and Waze, opening the chosen app with the plan as destination; option "Recordar mi elección". No public transport routing.
- FR-8.2 A default app can be chosen in Ajustes ("App para cómo llegar": Preguntar by default).

Verification (09) and reports (09b)

- FR-9.1 Verification: single-choice chips for still happening (Sí / No, ya no existe / No sé), price paid (Gratis / Menos de ₡2.500 / ₡2.500–₡5.000 / Más de ₡5.000), schedule correct (Sí / No + correct time), optional photo; then send.
- FR-9.2 Report: one reason from the list in Business rules, optional free text ("Contanos más"), optional photo, anonymous; send closes the sheet.

Reviews (07, 10)

- FR-10.1 Rating summary with distribution, "Escribir reseña", sort (Recientes / Con fotos / Más útiles; Android also filters by Familias and Estudiantes).
- FR-10.2 Review item: initials, name, date, who they went with, stars, text, photos and a "útil" action.
- FR-10.3 Composer: stars, who you went with (En familia, Con amigos, En pareja, Solo/a), how much you spent (Nada, Menos de ₡2.500, ₡2.500–₡5.000), text, photos; Publicar.

New vueltica (06, 11)

- FR-11.1 Form: type (Lugar / Evento), name, category, location on a map with "Cambiar", date and time (events), description, cost (Gratis / Con costo + price per person, free for students or seniors), audiences, photos, and a confirmation that it costs ₡5.000 or

less and is open to the public.
- FR-11.2 Explain that the community reviews every vueltica and that the author's name is shown.
- FR-11.3 "Enviar vueltica" is pinned at the bottom (iOS also has a ✓ in the toolbar).
- FR-11.4 Confirmation shows the status steps: Enviado → En cola de moderación (votes so far) → Publicado en el mapa, with "Ver mis vuelticas" and "Volver al mapa".

Saved (13)

- FR-12.1 Segmented Todo / Lugares / Eventos; reminder note ("Te avisamos 1 día antes…" with "Cambiar"); grouped by Esta semana / Próximo mes; cards show verification status.

Profile (14, 14b)

- FR-13.1 Header: initials avatar, name, province and member since, level badge ("Nivel 3 · De confianza").
- FR-13.2 Stats: Vuelticas, Reseñas, Verificaciones.
- FR-13.3 Reputation card: level number and name, points, progress to next level, current perk; the info button and the badge open the explanation pop-up (points, levels, "Entendido").
- FR-13.4 Moderación entry "Revisar vuelticas · 6 pendientes" (only for level 3+).
- FR-13.5 Mis vuelticas with status per item (En revisión · 3 de 5 votos, Publicado · views, No publicado · reason).
- FR-13.6 Social links (Instagram, TikTok, Facebook, WhatsApp, @mivueltica), Ajustes, Normas de la comunidad, Cerrar sesión.

Moderation (20)

- FR-14.1 Two lists: Nuevas (count) and Reportadas (count).
- FR-14.2 New item: photo, title, type, place, date, price, author and age, vote progress ("3 de 5 votos para publicar"), Rechazar / Aprobar.
- FR-14.3 Reported item: report count and top reason, last report and author, Sigue igual / Ocultar vueltica.
- FR-14.4 After voting the card shows "¡Gracias! Tu voto quedó registrado · +1 confianza" with Deshacer.

Settings (15)

- FR-15.1 Apariencia: Modo oscuro switch.
- FR-15.2 Accesibilidad: text size (follows system by default), Botones más grandes, Aumentar contraste, Reducir movimiento.

- FR-15.3 Notificaciones: Recordatorios de eventos guardados, Planes nuevos cerca (max 1 a week), Estado de mis vuelticas.
- FR-15.4 Preferencias: Precio máximo, App para cómo llegar. Privacidad y cuenta: Ubicación, Descargar mis datos, Eliminar cuenta.

Offline (17)

- FR-16.1 Banner "Sin conexión" with Reintentar; show saved and recently viewed plans from cache; actions that need the network are disabled.

Data model

The screens need ten entities; the fields below are what the UI displays or collects.

Entity	Fields the frontend needs
Vueltica (plan)	id, type (lugar / evento), name, category, description, photos, location (lat, lng), address, province, start/end date and time (events), opening hours (places), price tier, price per person (₡), free-for audiences (students, seniors), audiences, wheelchair accessible, status (pendiente, publicada, rechazada, oculta), author, created at, last verified at, verification count, rating average and count, distance from user (computed)
User	id, display name, initials, province, member since, sign-in provider, level, points, counts (vuelticas, reviews, verifications), settings
Settings	dark mode, text size, larger buttons, more contrast, reduce motion, notification switches (saved reminders, new nearby, my vuelticas status), max price, default directions app, remembered directions choice, location permission state
Saved	user, vueltica, saved at, reminder offset (1 day before)
Review	id, vueltica, author, date, stars 1–5, went with, spent tier, text, photos, useful count, marked useful by me
Verification	id, vueltica, user, still happening (yes / no / unknown), price paid tier, schedule correct (yes / no + corrected time), photo, created at

Entity	Fields the frontend needs
Report	id, vueltica, reporter (stored, never shown), reason, details text, photo, created at
Moderation item	vueltica, kind (nueva / reportada), votes for and against, votes needed (3 or 5), report count and top reason, last report at, my vote (if any)
Reputation event	user, kind (published, verified, review useful, moderation vote, rejected, reported), points delta, created at
Level	number 1–5, name, points threshold, perk text

APIs the frontend calls

The frontend needs these operations; names are suggestions, the backend team picks the shape.

Operation	Used by	Notes
List vuelticas in a map area	Mapa, Lista	Filters: type, price tier, audiences, distance, date, accessibility, search text; returns pins + count + free count; clustering on the client
Search vuelticas	Búsqueda	Text query + same filters; empty result drives Sin resultados
Get vueltica	Detalle	Includes verification summary, review preview, community line
Create vueltica	Nueva vueltica	Photos upload; returns status pendiente
My vuelticas	Perfil, Vueltica enviada	Status and vote progress per item
Save / unsave, list saved	Guardados, Detalle, cards	Signed in only
Verify vueltica	Verificación, "Sí, sigue igual"	+2 points
Report vueltica	Reportar	Anonymous to other users

Operation	Used by	Notes
List reviews, create review, mark useful	Reseñas, Escribir reseña	Sort and filter options
Moderation queue	Moderación, Perfil count, Pendiente pins	Level 3+ only
Vote / undo vote	Moderación	Returns new vote progress; +1 point
Reputation summary	Perfil, pop-up	Level, points, next threshold, perk
Sign in / sign out	Login	Apple (iOS), Google, email
Get / update settings	Ajustes	Also stored locally for offline use
Export my data, delete account	Ajustes	Delete keeps published vuelticas as Anónimo
Push notifications	Ajustes switches	Saved-plan reminder 1 day before; new nearby (max 1 a week); status of my vuelticas

Non-functional requirements

One Expo codebase must feel native on each platform while custom content keeps the Ruta Clara look.

Platform and stack

- NFR-1 Expo (React Native) for iOS and Android from one codebase, with expo-router.
- NFR-2 System controls stay native, keeping their system shape and font: tab bar (expo-router native tabs), Stack headers and search, and Expo UI (`@expo/ui`) for buttons, switches, sliders, checkboxes (Android; iOS uses switches), text inputs, segmented controls, date pickers, lists and bottom sheets. Sheets use half and full heights only.
- NFR-3 Custom React Native views for app content: activity cards, badges, chips, reviews, empty states, reputation card and pop-up, moderation cards.
- NFR-4 Map with expo-maps; pins are exported PNG images (14: place, event and pendiente; selected and not; three price tiers for place and event), clustered with supercluster.

Dark mode

- NFR-9 Full dark theme for every screen, following the system by default, with an in-app override (Ajustes → Modo oscuro).
- NFR-10 Dark map: the provided light map and its generated dark version switch with the theme.

Accessibility

- NFR-11 Respect system text size; offer larger buttons, more contrast and reduced motion.
- NFR-12 Text contrast meets WCAG AA in both themes; selected chips and filled buttons switch label color in dark mode.
- NFR-13 Every icon button has an accessible label; screen-reader order follows the visual order.

Language and locale

- NFR-14 Spanish for Costa Rica, using voseo ("Descubrí", "Contanos", "podés"); colones formatted ₡5.000; dates like "Viernes 24 de octubre"; 12-hour time with a.m./p.m.

Privacy and location

- NFR-15 Location only while the app is in use; the app works without it by choosing a province.
- NFR-16 Reports are anonymous to other users; account deletion and data export are available from Ajustes.

Performance and states

- NFR-17 Every data screen has loading (skeleton), empty and offline states; saved and recently viewed plans are available offline.
- NFR-18 Map panning stays smooth with hundreds of pins (clustering, image pins).

Assets and open questions

Most assets exist in Figma; the open questions below decide numbers the design only shows as samples.

Assets to export

- [ ] 14 map pin PNGs at @2x and @3x (place and event in 3 price tiers, selected and not; pendiente, selected and not)
- [ ] App icon: iOS 1024 px and Google Play 512 px (frames exist on Foundations); Android adaptive icon still to design
- [ ] Light and dark map images (for the prototype; production uses expo-maps tiles styled to match)

- [ ] Logo 3d as SVG for the Login screen
- [ ] Category icons (place, event) and the 37-icon set, or map them to SF Symbols / Material Symbols
- [ ] Store icons for Apple Maps, Google Maps and Waze

Open questions

- [ ] Points thresholds for each level, and how many points a rejected or reported vueltica costs
- [ ] Should level 3 authors need 3 votes and others 5, as designed, and is level 2 really required to verify prices?
- [ ] How long a vueltica stays hidden after 3 reports before moderators must decide
- [ ] Real social handles (@mivueltica is a placeholder)
- [ ] Copy for Normas de la comunidad and the Terms and Privacy pages linked from Login
- [ ] Whether the Aportar tab and "Aportar un lugar" should become "Sumar vueltica" to match the new naming
- [ ] Android adaptive icon layout for the icon logo
- [ ] Notification copy and timing beyond what the settings show
